

Web Development Curriculum

20-Day Syllabus & Assignments • APSSDC-Style Progression

Module 1: Front-End Basics & Responsive Design

Day	Syllabus / Topics	Practical / Assignment
1	Introduction to Web Development, Internet, Websites, Web Apps, Browser, Client & Server	Assignment 1: Create a simple personal webpage
2	HTML Introduction, Structure, Headings, Paragraphs, Links, Images	Practice HTML page
3	HTML Lists, Tables, Forms, Input Types, Buttons, Semantic Tags	Assignment 2: Create a Plant Information webpage
4	CSS Introduction, Selectors, Colors, Fonts, Backgrounds, Borders	Assignment 3: Style the Plant Information page
5	CSS Box Model, Margin, Padding, Display, Width/Height	Practice card layouts
6	Flexbox, Grid, Positioning	Assignment 4: Create a Plant Gallery
7	Responsive Design, Media Queries, Bootstrap basics	Assignment 5: Make the Plant Gallery responsive

Module 2: Interactivity with JavaScript

Day	Syllabus / Topics	Practical / Assignment
8	JavaScript Introduction, Variables, Data Types, Operators	JavaScript basic exercises
9	Conditions, Loops, Functions, Arrays, Objects	Assignment 6: Create a simple plant-data program
10	DOM, Selecting Elements, Changing Content & CSS	Display plant information dynamically
11	Events, Buttons, Dropdowns, Form Handling	Assignment 7: Select a plant and display its care

Module 3: Back-End, Databases & Final Project

Day	Syllabus / Topics	Practical / Assignment
12	JavaScript Validation, JSON, Fetch/API basics	Assignment 8: Add plant search functionality
13	PHP Introduction, Variables, Conditions, Loops, Functions	PHP basic exercises
14	PHP Forms, GET/POST, Form Validation	Create a plant-care request form
15	XAMPP, Apache, MySQL, phpMyAdmin, Database & Tables	Assignment 9: Create plants database/table
16	PHP + MySQL Connectivity, INSERT & SELECT	Display plant data from database
17	UPDATE, DELETE, CRUD basics	Practice database operations
18	Mini Project: Plant Care Guide	Build complete project
19	Project Testing, Debugging, Responsive Design & Improvements	Assignment 10: Complete and test project
20	Final Project Demo, Presentation, Viva & Revision	Students present their Plant Care Guide

Final Project: Plant Care Guide

The final website serves as an interactive platform allowing users to view dynamic plant care instructions pulled from a database.

1 Select a plant → 2 View plant image → 3 Read general info → 4 View care instructions

Example Output: Aloe Vera

Sunlight

Bright sunlight

Water

Once every 2–3 weeks

Soil

Well-drained soil

Temperature

15–30°C

10 Core Assignments Summary

1 Personal Webpage

2 Plant Information Page

3 CSS Styling Implementation

4 CSS Flex/Grid Plant Gallery

5 Responsive Plant Gallery

6 JavaScript Plant Data Logic

7 Plant Selection & Care Display (DOM)

8 Interactive Plant Search

9 MySQL Plant Database Integration

10 Final Plant Care Guide Project

Skill Progression Path

This curriculum offers a structured, step-by-step evolution from static markup to a dynamic, database-driven application.

HTML → CSS → Responsive Design → JavaScript → PHP → MySQL →

FINAL PROJECT
